ABOUT US

Bringing industry leading environmentally friendly cleaning solutions from the Middle East and Europe to the US, Reef was formed in 2024 as a Joint Venture.

Our cleaning solutions, formulated by top chemists and in the market over the last 10 years, have revolutionized the cleaning industry overseas by being safer and more sustainable without sacrificing effectiveness or efficiency.

OUR MISSION

Reef's mission is to disrupt the specialized cleaning industry by providing effective, safe, and sustainable alternatives to the many toxic solvents the industry currently relies.

We aim to create a ripple effect that benefits both our communities and the planet for generations to come.

WHY REEF

VERSATILE & MULTIPURPOSE

Suitable for diverse applications—refineries, tankers, pipelines, aviation, maritime, oil, rail, and weapons.

ECO-FRIENDLY SOLUTIONS

Non-toxic, biodegradable, sustainable formulations protect the environment, while maintaining industrial cleaning standards.

ENHANCE EQUIPMENT LONGEVITY

Prevents wear, corrosion, and buildup, extending the life of tools and machinery.

COMMITMENT TO SUSTAINABILITY

Prioritizes environmental protection without compromising performance, aligning with global regulations.

HIGH PERFORMANCE

Matches or exceeds the effectiveness of traditional toxic solvents without sacrificing safety or sustainability.

USER SAFETY & EASE

Non-flammable, non-abrasive, and low-odor formulations eliminate the need for protective gear, ensuring safe handling.

OPTIMIZES EQUIPMENT EFFICIENCY

Residue, scale and contaminants are removed with the cleaning process, doubling the yield of the equipment.

CUSTOMER-CENTRIC APPROACH

Focused on delivering tailored, effective solutions that meet modern demands and ensure full satisfaction.

COST-EFFECTIVE & EFFICIENT

Concentrated, dilutable solutions reduce costs, save time, and minimize repetitive cleaning.

TAILORED INDUSTRY SOLUTIONS

Cutting-edge products designed to meet the specific needs of various industries.

INNOVATIVE FOAM TECHNOLOGY

Efficient foaming action ensures deep cleaning and thorough removal of heavy contaminants.

BETTER INGREDIENTS

The non-corrosive properties of our solutions prevent equipment damage from chemical reactions.

OUR SOLUTION

Industrial degreasers
Machine compatible cleaners
Descalers
Multipurpose cleaners
Specialized cleaners

GreaseGone™

ALL-IN-ONE KITCHEN SOLUTION

GreaseGone is a modern, eco-friendly solution for industrial kitchens. A powerful and innovative alternative to traditional caustic and acidic cleaners. This highly concentrated formula delivers industrial-strength cleaning and degreasing without the use of harsh chemicals. It effectively removes dirt, grease, oil, and stains from all washable surfaces with ease, making it an ideal choice for industrial kitchens.

Designed for versatility, GreaseGone is compatible with both manual cleaning methods and professional-grade equipment. By incorporating GreaseGone into industrial kitchen cleaning routines, businesses can significantly improve indoor air quality and support the health and well-being of their staff. Additionally, it helps reduce water pollution by eliminating synthetic detergents and microplastics from wastewater.

For added sanitation, disinfectants can be seamlessly integrated into GreaseGone cleaning solutions when needed, ensuring a safe and hygienic kitchen environment.

TEST US

We tailor solutions to meet your environmental challenges. Our products are designed for effectiveness—we look forward to challenging any solvent or other solution. Free onsite evaluation available. See how our sustainable, non-toxic solutions compare.
